Thomas NIGNAN

Full Stack Software Engineer

Motivated, agile, problem-solving Full-Stack Developer with a background in Finance and Computer Science, with 2+ years of development experience in remote collaborative teams, I want a software developer position in a tech company/startup. I deliver eye-catching yet human-centered products that drive leads, stay on-trend and are easily maintained.

WORK EXPERIENCE

Backend Software Engineer
Lifestores Pharmacy(Nigeria)

01/2020 – 04/2020   *Kigali, Rwanda*

Lifestores Pharmacy aims to be the leading pharmaceutical retail company for the Nigerian mass market. Our mission is to empower our customers to manage their health & wellness.

Achievements/Tasks

- As an active Agile backend member, I boosted productivity by implementing a new way of posting our daily standups 3 times a day making the team more accountable for their working time.
- Build high standard features, tested, review Pull Requests.
- DevOps with Travis continuous integration tool, Heroku.

Contact: Suhmayah Banda(CTO) – s.banda911@googlemail.com

Full Stack Software Engineer
Andela Rwanda

09/2019 – 04/2020   *Kigali, Rwanda*

Andela is solving the technical talent shortage by building distributed engineering teams with Africa's most talented software engineers. Andela software engineers work as full-time engineers with companies ranging from the Fortune 500 to high-growth startups like Gusto and Cloudflare.

Achievements/Tasks

- Worked on Full Stack Javascript(NodeJS/Express/React/Redux) internal products in an Agile collaborative environment remotely mostly.
- Leading at multiple instances a team of 5 SE building world-class features, reviewing Pull Requests.
- DevOps with Travis continuous integration tool, Heroku.
- Project Management with tools like Pivotal Tracker.

Contact: Samuel Nishimwe(Manager) – samuel.nishimwe@andela.com

Javascript · NodeJs/Express · React/Redux · PostgreSQL · DevOps · Test Driven Develpment · Mocha · Chai · Jest · Enzyme · Git/Gihub · Project Management · Communication · Python · Django · TravisCI · OOP · Debugging · Swagger · GraphQL · Rest API · Sequelize

PERSONAL PROJECTS

WayFarer (05/2019 – 12/2019) ↗
- A full-stack bus ticket booking webapp. Built user interface using React/Redux.
- Built NodeJS/Express backend APIs, JWT authentication, PostgreSQL Database.
- Extra tools: Pivotal Tracker, Mocha TDD, TravisCI, Heroku, ESLint, Coveralls.

The Automatic Awning (03/2019 – 04/2019)
- The Automatic Awning protrudes to cover your clothes upon sensing incoming rain and retracts when the rain ceases.
- Built using Arduino Uno micro-controller, a rain sensor and a stepper for hardware part and C++ for the software part.

Sapologie (03/2019 – 03/2019) ↗
- A full-stack e-commerce website for African apparel and accessories. Built user interface using React front-end framework.
- Used Python/Django full-stack with authentication & admin to build the backend.
- Created PostgreSQL Database to store products. Built custom RESTful APIs to outsource data and login from React UI.
